As a skilled and versatile Software Developer, I bring a strong foundation in both front-end and back-end technologies, with expertise in Node.js, Express, and Next.js. I excel in collaborative environments where innovation and efficiency drive success. My problem-solving mindset and continuous learning approach help me deliver high-impact solutions. My experience spans full-stack development, microservices architecture, and leadership roles, where I drive innovation and quality.

WORK EXPERIENCE

Part-time Team Lead (Node.js/Next.js) | ITMedia | Remote (USA)

2024 July - Now

Initially worked as a full-stack developer with PHP, transitioning to a Node.js/Next.js Team Lead role, overseeing the development of web applications. Contributed to both backend architecture and frontend optimization, while leading a small team to deliver scalable and efficient solutions.

Back-End Engineer (Node.js, PHP, MySQL) | MFMsoft | Remote (USA)

2024 January - Now

Involved in developing full-stack web applications using Node.js and PHP, with a focus on database management (MySQL). Participated in API integrations and automation processes, ensuring seamless workflows and high-quality deliverables.

Intern - Front-end Developer (React.js) | PADC LLC | Gyumri (On-site)

2023 September - 2023 December

Developed responsive front-end components using React.js and integrated with REST APIs. Worked on state management with Redux and participated in code reviews, contributing to a collaborative team environment.

CERTIFICATIONS & COURSES

Full Stack Web Development | GITC | March 2023 - September 2023

Developed responsive front-end components using React.js and integrated with REST APIs. Worked on state management with Redux and participated in code reviews, contributing to a collaborative team environment.

Python Programming Language | Yandex School | 2018 - 2019

Completed a foundational course in Python, exploring data structures, algorithms, and software development principles.

Web Development | TUMO Technologies Center | 2016 - 2020

Studied web development, including PHP, MySQL, Javascript, WordPress, and gained hands-on experience with building websites and applications.

SKILLS

As a dedicated back-end developer, I specialize in building robust, scalable server-side applications. My expertise lies in Node.js, Express, Nest.js, and PHP, with a strong focus on REST API development and seamless database management using MySQL, PostgreSQL, and Prisma ORM. I am proficient in JWT and Passport for user authentication, and I have experience integrating vPOS systems for secure payment solutions.

In addition, I am skilled in building microservices architectures and optimizing database queries for performance. I am also well-versed in containerization with Docker and have hands-on experience with CI/CD pipelines for efficient, automated development workflows. My knowledge of Redis for caching and session management ensures high-performance and fast data access.

While my primary expertise lies in back-end development, I also possess strong front-end skills in React.js, Redux, and Next.js, enabling me to contribute effectively across the full stack.

Back-End Technologies:

- Node.js, Express.js, Nest.js, PHP,
- REST APIs, GraphQL
- MySQL, PostgreSQL, Prisma ORM, Redis, Query Optimization
- JWT, Passport, vPOS Integration

Tools & Others:

- Git, GitHub, GitLab, Jira, Trello, Agile
- Swagger, Insomnia, Postman,
- Problem Solving, Team Leadership, Adaptability, Time Management, Research and Learning

Front-End Technologies:

- React.js, Redux, Next.js, Chakra UI, Tailwind CSS
- JavaScript, TypeScript, HTML5, CSS3
- State Management (Redux Toolkit, RTK Query, Redux Thunk)
- i18n, Responsive Design, Accessibility
